

Haier

Smaller Footprint.

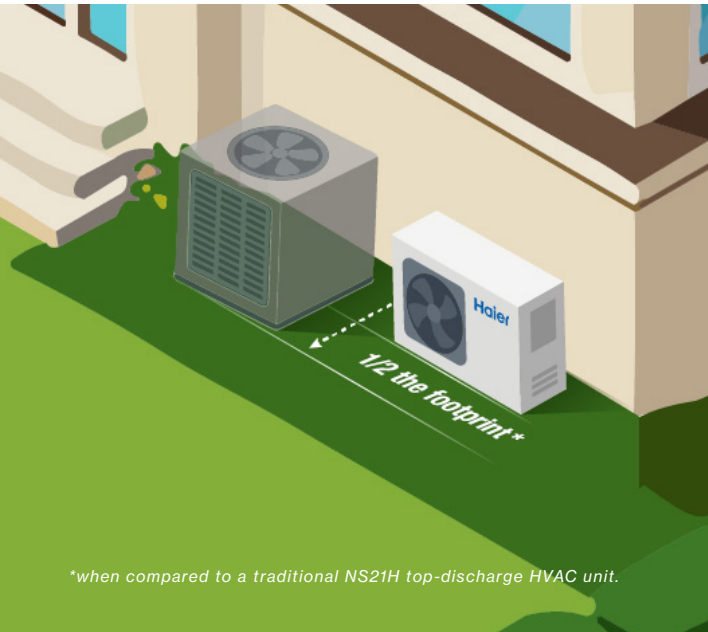

BIG PERFORMANCE.

Haier Side-Discharge Ducted Heat Pumps

Haier Side-Discharge Ducted Heat Pumps make comfort easy, season after season. Compact, efficient, and quiet — even in extreme temperatures.

*when compared to a traditional NS21H top-discharge HVAC unit.

Side-Discharge Ducted Heat Pumps

Compact Design

Designed to fit tight spaces, the compact side-discharge unit needs minimal clearance (4" in the back/14" in the front) – making it easy to install in small yards or close to walls while still delivering full comfort.

Side-Discharge Ducted Heat Pumps | Features & Benefits

High-Performance Inverter Technology

An energy-saving heat pump that keeps your home comfortable year-round while lowering utility costs.

Environmentally Friendly

Uses R454B - a smart, eco-friendly refrigerant with low environmental impact and high efficiency.

Comfort in Cold Climates

Easy to own and built for extremes – keeps your home warm down to -22°F.

24V Thermostat Compatibility

Compatible with popular 24V thermostats; no extra adapters or special controls needed.

Built for Quieter Living

Designed to minimize outdoor noise, so your comfort blends in without disruption.*

*1U24T3PS1HE capable of performing at 54 dB; see product specifications for other models.

Worry-Free Ten-Year Limited Warranty

Register your unit and double your warranty from 5 to 10 years. Comfort made easy, with coverage that's easy to own. See warranty documentation for complete details.

Flexible Systems

Choose from three available outdoor models, each compatible with a variety of air handlers and evaporator coils.
