Symbols glossary (TT)

The automatic defrost system works by automatically defrosting at regular intervals eliminating the need to defrost altogether.

Economical mode: Analyzes fridge functioning during the activation and optimizes the operating cycle in order to reduce power consumption.

Fast freezing: The fast freezing function brings the temperature of the compartment down when activated a few hours prior to usage.

Life Plus 0°C: The temperature in the Lifeplus compartments is kept at 0°C, which preserves fresh meat and fish longer.

Air plus: keeps food fresher for longer.

LED display: to show programmes, functions and options selected and the time to the end of the cycle.

Ventilated: Forced distribution of cold air in the refrigerator compartment, which allows even temperature distribution within the fridge.

LED interior lighting: is a more energy efficient and long lasting way of illuminating the interior of the appliance.

Inverter technology: The evolution of Smeg's driers towards more intelligent and environmentally sustainable models has led to the choice of using Inverter technology with heat pumps, which reduces significantly energy consumption.
