PSC23SHR – GE Profile CustomStyle™ 22.6 Cu. Ft. Side-by-Side Refrigerator with Refreshment Center

Rough-In Dimensions

Standard, New Construction and Replacement Installation

Installation Tips to Maximize the Built-In Look

- All wall/floor molding should be removed prior to installation.
- Water recess on rear wall recommended to prevent water line damage. 48" minimum length, 1/4" diameter water line tubing recommended.
- When possible, recess both copper water line and electrical outlet.
- (See local codes)
- Front and rear leveling legs are adjustable for the built-in look.
- (See owner's manual)
- If optional collar trim kit is to be used or anticipated, see collar trim installation on next page for different rough-in dimensions.

*The rough-in dimension of 70-1/4" is minimum and is measured from the finished floor to top of opening (or the underside of the overhead cabinets). For Models with Trim Kit: If frameless style cabinets are planned for above the refrigerator, you may need to consider adding a maximum of 1/4" (70-1/2") to height of opening to allow additional clearance between cabinet doors and top of refrigerator trim when cabinet doors are in open position.

Total volume and shelf area are calculated by the Association of Home Appliance Manufacturers' standards.
