

GE Profile™ and GE® Side-by-Side Refrigerators

dreams come true

The built-in look you've dreamed of
without the built-in expense

imagination at work

Your dream kitchen starts with a counter-depth refrigerator.

With custom panels

Without panels

This is the stuff dreams are made of. GE Profile™ and GE counter-depth side-by-side refrigerators grace your kitchen with the look of built-in styling without the expense of a built-in.

Counter-depth styling allows counter-depth refrigerators to blend in almost seamlessly with surrounding cabinetry. These units simply slide into the space between cabinets, for the built-in look you envisioned.

With counter-depth styling, GE's counter-depth refrigerator makes your kitchen new! While your old refrigerator extended up to 33" from the wall, protruding more than 6" beyond the depth of countertops and cabinets, the counter-depth side-by-side extends just 26-3/4" from the wall.* It slides right into the same opening as your old refrigerator, and thanks to that 6 inches saved, fits almost completely flush with surrounding cabinetry. Just one simple step, and your new counter-depth refrigerator updates your kitchen, giving you the sleek, built-in look you've dreamed of... without the expense of a built-in.

Most refrigerators extend up to 33" from the wall

Counter-depth refrigerators extend just 26-3/4" from the wall, saving you six inches!*

*for 23 cu. ft. models

How to realize your dream

Panels or no panels?

Design options to suit your style

The look you want is easy to achieve with counter-depth side-by-side refrigerators. Choose from models designed

to accept stainless steel or acrylic panels, or cabinet-matching, custom-made wood panels. In fact, panels can be made from any material you care to dream up—and easily slide into place.

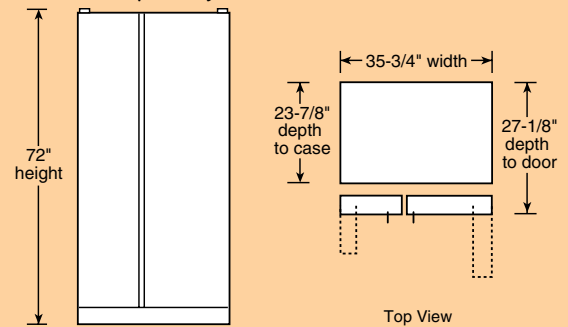

If you prefer, stylish no-panel models are available in a choice of colors, including stainless steel, and a variety of handle styles. Both panel-ready and no-panel models are available in 23 and 25 cu. ft. sizes.

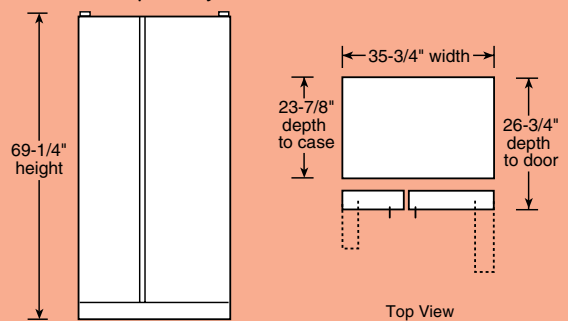

By deciding whether you prefer a counter-depth refrigerator with panels or without, you've narrowed the choices down.

What's your size?

25 cu. ft. capacity

23 cu. ft. capacity

A few simple steps make your dreams come true

Choosing your counter-depth refrigerator is easy. First, a tape measure will determine which model size fits the existing opening in your kitchen. Height makes the difference. The width and case depth on 23 and 25 cu. ft. models are identical, but the 25 cu. ft. model is slightly taller.

Now all that's left is for you to choose your favorite color, handle style, and your must-have list of features. The remaining pages of this brochure will guide you to the final selection of the counter-depth side-by-side refrigerator that makes your dream kitchen a reality.

Panel-ready refrigerators*—23 cu. ft. capacity

From old to new

Your dream kitchen is born

It's like a one-step kitchen renovation! Simply replace your old refrigerator with a GE® or GE Profile counter-depth side-by-side. In an instant you have the built-in look you've dreamed of, without the expense of a built-in.

Older models protrude more than six inches.

Counter-depth models fit flush with cabinets.

ENERGY STAR®

As an ENERGY STAR partner, GE has determined that the appliances marked with the ENERGY STAR logo meet the ENERGY STAR guidelines for energy efficiency.

The following models are ENERGY STAR-qualified:

25 Series:

PSH25MGT
PSH25MST
PCF25PGT
PSC25PST

PSC25MGT
PSC25NST
PSC25MST
PSH25PST

23 Series:

PSH23PGT
PSW23PST
