USER GUIDE

WELCOME TO U-LINE

Congratulations on your U-Line purchase! Your product comes from a company with decades of premium modular ice making, refrigeration, and wine preservation experience. U-Line creates products focused on functionality, style, and inspired innovations — paying close attention to even the smallest details. Applications include residential, outdoor, ADA height compliant, marine, and commercial. Product categories include Beverage Centers, Wine Refrigerators, Ice Machines, Refrigerators, Freezers, and Dispensers. Our advanced refrigeration systems, large and flexible capacities, and clean integrated look are what makes our products Built-In to Stand Out®. Since 2014, U-Line has been part of the Middleby family of brands. Products are designed, engineered, and assembled in Milwaukee, Wisconsin, USA, and select products are available worldwide.

U-Line — RIGHT PRODUCT. RIGHT PLACE. RIGHT TEMPERATURE.®

Integrated Panel Dimensions

NOTE

Panel thickness may be 5/8" or 3/4". Center the unit in the 15" opening. If the hinge side of the unit is pressed against the adjacent cabinet, use a 5/8" thick panel.

Maximum panel weight is 15 lbs.

Integrated Door Panel for
15" (381mm) wide unit

Integrated Panel Installation

Cut and prepare panels according to the information provided in the Integrated Panel Dimensions section.

It is important to use the factory provided grille that came with the product to assure proper air flow is maintained through the condenser. The use of a custom grille is not recommended and will void the warranty.

REMOVE DOOR

See Door Adjustments section.

ASSEMBLE THE PANEL TO THE DOOR

- 1. With the door laying on a flat surface and starting at the corner of the door, remove the magnetic door gasket from the interior side of the door. Set the gasket aside on a flat surface.
- 2. Align the panel to the door. Make sure the sides and top are flush.

- 3. With bar clamps or "C" clamps, secure the panel to the door

- 4. At each of the 10 holes in the gasket extrusion channel, drill pilot holes into the wood panel. Use the drill size from the chart in the table below being careful not to drill through the front surface of the panel.

Material Type	#10 Wood Screw
Hardwood	1/8" (3.2mm) Diameter Pilot Hole
Softwood	7/64" (2.8mm) Diameter Pilot Hole

- 5. Fasten the panel to the door with the 10 screws provided in the literature pack.
- 6. Remove the clamps and replace the gasket in the gasket extrusion channel. Some force may be required to seat the gasket into the channel. Be sure the gasket corners are seated correctly.

INSTALL THE DOOR

See Door Adjustments section.

Grille Installation

REMOVING AND INSTALLING GRILLE

Disconnect electric power to the unit before removing the grille.

When using the unit, the grille must be installed.

Do NOT touch the condenser fins. The condenser fins are SHARP and can be easily damaged.

Removing the grille

1. Disconnect power to the unit.
2. Remove the two screws.
3. Remove grille from unit.

Installing the grille

1. Align cabinet and grille holes and secure, but do not over tighten grille screws.
2. Reconnect power to the unit.
